Hi! My name is Sphero. I blur the line between learning and fun!

I'm so versatile that kindergarten students can learn from me, but so can high school students. I'm one of the few robots that can say that!

Fun Facts About Me:

- My outer shell is very tough. It really isn't easy to bring me harm!
- I can swim!
- I must be connected to the Sphero EDU app before I will do absolutely anything!

Getting to Know Me:

- I must be aimed each time before I am used. I have a taillight that helps make this easy.
- I usually take 6 to 8 hours to charge if my battery is fully depleted. Yes, I know that can be drag!
- The easiest way to have an entire class connect to me is one device to one robot at a time. Multiple students trying to connect at the same time may cause chaos!
- Depending on the activity I can require a decent amount of floor space.

Things that make me special:

- I can be used as a paintbrush.
- I understand block-based coding and text-based Javascript!
- There is an incredible amount of resources available from Sphero EDU.
- I can travel at speeds up to 4.5 mph

Things that make me a little weird:

- I must be aimed each time before I am used. I have a taillight that helps make this easy.
- I usually take 6 to 8 hours to charge if my battery is fully depleted. Yes, I know that can be drag!
- The easiest way to have an entire class connect to me is one device to one robot at a time. Multiple students trying to connect at the same time may cause chaos!
- Depending on the activity I can require a decent amount of floor space.
